The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Dittmar et al.

Dittmar et al shows a tool having a handle portion 6 and a holder cavity portion 7,8. Surface 14 may be termed a first abutment surface and the surface behind surface 14 may be termed a second abutment surface. The device is integrally molded plastic. Statements of intended use have not been accorded patentable weight. In any case, the Dittmar et al tool is considered to be capable of performing the recited intended use; ie., a connector can be placed in the cavity and a thumb may also be place in the cavity.

Claims 3-4 and 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
